

## States Edge Energy Center

States Edge Energy Center is a proposed renewable energy generation facility expected to include 2+ gigawatts of wind power, located in Cimarron and Texas Counties, Oklahoma targeted to begin operations in 2028. Wind energy is independent, renewable power from one of the oldest known energy sources, and today it is one of the most affordable ways to modernize America's energy grid.

Potential to power up to **1 million American homes**

More than **\$1 billion invested** in landowner payments and wages over the life of project

More than **\$4 billion of capital investment** in Northwest Oklahoma

Up to **500 jobs** supported annually during construction over 3 years

An estimated **30 full-time** operations and maintenance staff

Over **\$375 million invested** in new local tax revenue over the life of the project

Supports local education, emergency & veteran services and environmental stewardship

### Development Timeline
